

Boombox Micro Retail

Chicago, IL, United States

FIRM Latent Design

TYPE Commercial › Pop-Up
Cultural › Pavilion
Landscape + Planning › Public Park Urban Green Space

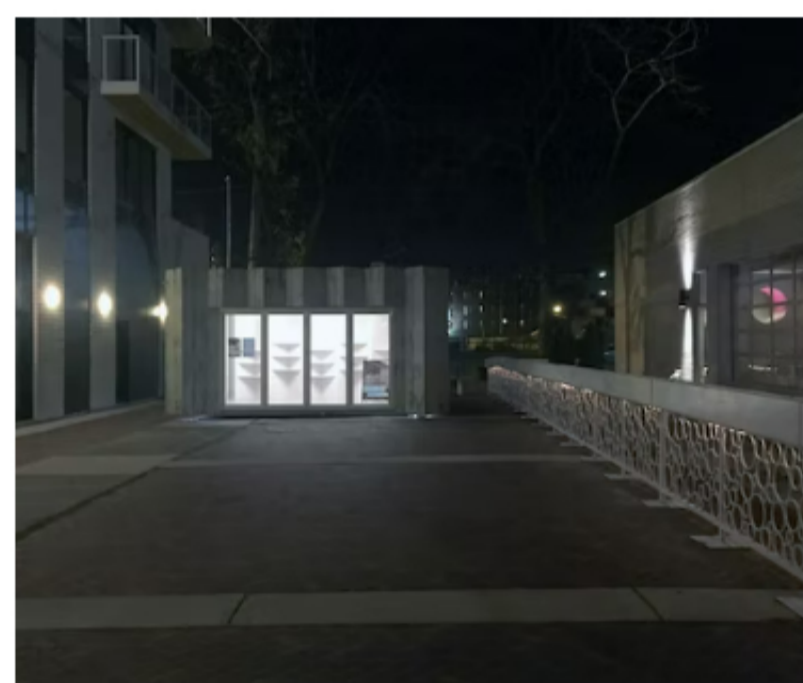

STATUS Built

YEAR 2015

SIZE 0 sqft - 1000 sqft

BUDGET \$10K - 50K

Boombox is a prefabricated micro retail kiosk, made from a refurbished shipping container, installed in public spaces to provide short term pop up retail opportunities and cultural experiences. The space is available for a wide variety of uses from selling clothing to launching a micro brew. It combines the successful features of pop-up shops and festival booths while providing innovative transitional retail spaces at competitive weekly rates. This exceptionally designed space will become an attraction that will rival storefront locations without the capital commitment.
